

Trace Digital Diary for Construction Sites

Optimize your project, connect remote on and off-site stakeholders, capture and trace daily operations related to your construction project.

Save up to 60% on paperwork time from day one, visualize real-time progress and act to optimize construction projects

DigiSign DagBok supports construction documentation capture and handling cutting the administration time at least by half. With DigiSign DagBok, project manager can visualize and securely share critical project data and directly start saving through project optimization. The legal power of DigiSign DagBok lies in linking actions, roles, responsibilities and legal proof hence providing a powerful digital transformation tool towards smart, accountable, and compliant construction sites.

Capture & trace in real-time

DigiSign DagBok supports daily capture and sharing of real-time site data about the weather conditions, on-site subcontractors and employees deliveries of critical materials, on-site visits, new site conditions, discrepancies in plans and/or conflicts and important observations.

Share & track change orders

DigiSign DagBok allows project manager to instantly create reports and follow up on the resolution of any particular site obstacle. Delays in responding to change orders can impact the completion the project. Thus, it is important to retain a record when the change order was submitted and when it was approved or rejected.

Secure IDs & information

DigiSign DagBok connects actors based on verified role-accesses and every action or piece of informations is locally-encrypted, digitally signed and legally archived. Ensuring integrity in information sharing.
